Mr. Jack Wilson, Acting Commissioner
Dept. of Natural Resources
and Environmental Protection
Capitol Tower Plaza
Frankfort, Ky. 40601

Dept. for Natural Resources & Environmental
Protection Commissioner's Office
Bureau of Environmental Protection

Dear Mr. Wilson,

On Monday, 3/11/80, I met Mr. Robert Koentop, Field Inspector, Hazardous Material Management Section, DNREP, at the site of the "Valley of The Drums". We were making a continued effort to identify drums potentially being ours. Despite a concerted effort we were able to isolate only nine additional drums to supplement the twelve from an earlier trip.

The count and location of drums is as follows:

Row 2	-	1	drum	containing	waste	solvent
		1	"	"	"	water
		1	"	empty		
Row 4	-	1	"	"		
		1	"	containing	waste	solids
Row 5	-	7	drums	empty		
		1	drum	containing	waste	solvent
		4	drums	"	"	solids
		2	"	"	"	black varnish
		2	"	"	"	water

I do not feel future field trips will prove fruitful in finding a balance of twelve drums from the original thirty-three directed as our responsibility. However, I would suggest that we be given permission to remove those as outlined above from the "Valley" for proper disposal along with our present waste streams.

Please notify us as to your feelings in regard to same.

Respectfully,

Clayton L. Simon
